

THE HUMAN SOUL

MIND

Your MIND takes in data it receives through your eyes, ears, nose, mouth and skin—24-7. It simply takes in all you see, hear, feel and taste. That's it. Just raw data.

EMOTIONS

Your EMOTIONS INTERPRET all the data that your MIND receives. Your emotions store the INTERPRETATION of all the data your brain recorded and can instantly recall all memories it attached to the data.

WILL

Your WILL considers all the data and **makes a decision**. The will can consider both the data and the interpretation of the data and make a logical or emotional decision.

In a balanced soul, the will is in charge. It considers both the data and the interpretations of the data and can make good and safe decisions. The enemy of our souls knows to attack us in our emotions by whispering in our ears (as he did to Eve). He interprets the data for us and spins it in order to produce fear, doubt, desires, etc. However, he is after our WILL. He needs to get us to make a decision—to agree with the lie. When our will chooses the lie, we are now his to control.
